## WORK COMPLETED

A new water heater was successfully installed in the client's utility room. The installation also included brand new pipes to ensure optimal performance and safety. All connections were tightly sealed to prevent any leaks, and the overall setup was organized for easy access and maintenance. The unit comes with a three-month guarantee, ensuring the client peace of mind with this essential home upgrade.

## MATERIALS USED

- Water heater
- Pipes
- Fittings
- Mounting brackets

## TECHNICIAN NOTES

The installation was completed flawlessly, and the system is functioning as expected with no issues reported. For future maintenance, I recommend checking the water heater's pressure relief valve monthly and flushing the tank every six months to prevent sediment buildup.

**Warranty:** This installation comes with a standard 90-day labor warranty.
